sumit singh

AI & Automation Engineer | Algorithmic Trading | Full-Stack Developer | Embedded Systems & Android OS Expert
Jammu, Jammu & Kashmir, India

Summary

I am a multi-disciplinary Engineer specializing in AI Orchestration, Algorithmic Trading, and System Automation. I build autonomous systems that bridge the gap between software and hardware. Highlights of my work:- AI Orchestration: Built an autonomous coding system using CrewAI, Cloud AI APIs, and LM Studio for self-correcting code generation.- Algorithmic Trading: Developed a Nifty Trading Bot with real-time API integration for automated options execution.- Data Engineering: Built a Market Intelligence Dashboard using Python (Selenium/Scrapy) for large-scale Zomato data extraction.- Systems & Hardware: Experienced in Arduino/Raspberry Pi assembly and programming, and deep Android OS modification (Rooting/Custom ROMs).- Interactive Media: Developed games in Unity and apps for the Play Store. Technical Toolkit: Python, CrewAI, SQL, Unity (C#), Arduino, Android OS, Web Scraping.

Experience

Self-Employed

Data & Automation Engineer | Algorithmic Trading Developer
2024 - Present (2 years)

Developed automated data scraping pipelines and algorithmic trading bots. Built a Nifty Trading Bot that utilizes APIs for real-time data ingestion and automated order execution in the derivatives market. Also developed a Zomato Market Intelligence Dashboard for market analysis.
